

**109
GALLON**

The Go-Getter

**Nothing can stop you with
109 gallons of extra fuel on board!**

Whether you're refueling equipment, vehicles, or ATVs, this tank is designed for the ultimate go-getters. Our 109-gallon refueling tank system is Department of Transportation (DOT) legal to carry and transfer gas, diesel, and kerosene.

Transfer Flow refueling tanks come complete with everything needed for installation.

The easy-to-use hose-purge feature allows you to pull any fuel left in the hose back into the refueling tank to eliminate messes in the truck bed and stretch your extra fuel capacity even further.

The 109-gallon refueling tank is made from 12-gauge, high-yield U.S. aluminized steel, for superior durability and strength; and powder coated black for durable satin finish. As with all Transfer Flow fuel tank systems, this refueling tank comes complete with all parts needed for installation.

LONG BED

Fits: All Full-Size Trucks
Fuel: Gas, Diesel, Kerosene
Ship Weight: 297 lb.
Dimensions: 54 3/4" L x 30" W x 22 5/8" H
