

**100  
GALLON**

## Laid Back

***Worry less, travel more with a  
Transfer Flow refueling tank in your truck bed!***

The unique design of the 100-gallon L-shaped refueling tank fits under most over-the-rail tool box configurations while providing extra fuel for your adventures. The 100-gallon refueling tank system is Department of Transportation (DOT) legal to carry and transfer gas, diesel, and kerosene.

Transfer Flow refueling tanks come complete with everything needed for installation.

The easy-to-use hose-purge feature allows you to pull any fuel left in the hose back into the refueling tank to eliminate messes in the truck bed and stretch your extra fuel capacity even further.

The 100-gallon refueling tank is made from 12-gauge, high-yield U.S. aluminized steel, for superior durability and strength; and powder coated black for durable satin finish. As with all Transfer Flow fuel tank systems, this refueling tank comes complete with all parts needed for installation.

LONG BED

**Fits:** All Full-Size Trucks

**Fuel:** Gas, Diesel, and Kerosene

**Ship Weight:** 329 lb.

**Dimensions:** 53 3/4" L x 35 7/8" W x 27 5/8" H

**Part Number:** 080-01-09418

### FEATURES AND BENEFITS
