

**82
GALLON**

Keep on Movin'

Save time and money with a mobile refueling station in the bed of your truck!

Our 82-gallon refueling tank system is the largest capacity refueling tank available that fits in a short bed pickup truck. It's Department of Transportation (DOT) legal to carry and transfer gasoline, diesel, methanol/ethanol, and kerosene.

Transfer Flow refueling tanks come complete with everything needed for installation.

The easy-to-use hose-purge feature allows you to pull any fuel left in the hose back into the refueling tank to eliminate messes in the truck bed and stretch your extra fuel capacity even further.

The 82-gallon refueling tank is made from 12-gauge, high-yield U.S. aluminized steel for superior durability and strength; and powder coated black for durable satin finish. As with all Transfer Flow fuel tank systems, this refueling tank comes complete with all parts needed for installation, down to the last zip tie.

SHORT AND LONG BED

Fits: All Full-Size Trucks
Fuel: Gas, Diesel, Methanol/Ethanol, Kerosene
Ship Weight: 251 lb.
Dimensions: 47 3/4" L x 19 5/8" W x 24" H
Part Number: 080-01-09420

FEATURES AND BENEFITS

- For drivers who own ATVs, boats, generators, landscape or farming equipment, or want to fuel their truck or additional vehicles
- Comes with 12-volt GPI® fuel pump, 12 ft. hose, nozzle, locking cap, wiring harness with cab-mounted power switch, and mounting hardware
- DOT legal for gasoline, diesel, methanol/ethanol, and kerosene
- Built from 12-gauge high-yield U.S.-made aluminized steel, for durability and strength
- Powder coated black for durable satin finish
- Pumps up to 15 gallons per minute
- Baffled to prevent fuel sloshing
- 6 year, unlimited mile warranty
- Made in USA
- Optional item: methanol/ethanol pump
